

Who we are:

NEXA | EAM, founded in 2015 in Ireland, began with just one client and one employee. Today, we are a trusted advisor to leading companies in the Life Sciences industry around the world with a growing team of over 87 employees. Our team of understanding, talented professionals create value for leading Life Sciences companies by focusing on the delivery of Asset Management solutions to enable world-class production. Our commitment to achieving excellence helps our clients accelerate the delivery of life-changing products to market. We achieve this through our people, who are always our highest priority. Are you ready to join a growing team that values your contributions, development, and wellness?

Here's what you'll get:

- Work Life Balance.
- Never a dull moment! - Exposure to diverse projects with collaborative teams.
- A work environment that is both rewarding and challenging.
- Successful training program to acclimate you in your new role & continued learning, including tuition reimbursement and weekly dedicated time towards development.
- Competitive Full-Time Benefits including Paid Time Off, Health, Retirement, Education & **more!**
- In-person and virtual social gatherings and events.

NEXA | EAM is searching for:

A full-time, Calibration Engineer II to support our clients in Dundalk, Ireland with activities related to the set up or optimization of their Calibration programs. You will work on-site with one of our new, leading Life-Science clients and will report directly to a NEXA | EAM Project Manager.

About the job:

- Reclassifying instrumentation properly through a Criticality Risk Assessment (CRA) program.
- Reducing calibrations per year through a Calibration Interval Analysis (CIA) program.
- Support in reducing the number of Out of Tolerance (OOT) events per year by investigating root cause of failures and developing strategies to eliminate these causes.
- Assisting with identifying gaps in the Calibration master data that could cause compliance issues and amending these gaps.
- Providing Subject Matter Expert-level support for instrumentation decisions.
- Assist with other projects, as required.

We are looking for people with:

- Associates degree, Bachelor's degree, or Trade Certification (e.g., ASQ CCT) in a related Engineering field.
- In the absence of the above, proven work history in a Life Science Calibration/ Engineering role will also be considered.
- 3-5 years of experience in Life Science Calibration/ Engineering Role.
- Proficiency in suggesting calibration parameters and diligent with documentation & CMMS use.
- Strong computer skills including advanced proficiency in MS Office, specifically MS Excel.
- Previous experience in acting as a lead / single point of contact for technical issues, program issues, training etc.
- Ability to speak confidently to Instrumentation issues and potential improvements.
- Understanding of Calibration Business Processes and where optimization is possible.

You will be a match if you are:

- Understanding of your client's and colleague's needs.
- Willing to operate the NEXA way, every day, by showing relentless drive in ensuring success.
- Attentive to detail and believe passionately in "Right First Time."
- Proactive in everything you do.
- An advocate of continuous improvement, which is vital to continued success.
- Adaptable and flexible to meet client and project needs.

If this sounds like you, apply today by: Emailing your updated resume to our HR & Recruitment Specialist – Candalee Alicea at calicea@nexaeam.com
